GOLD was steady in New York yesterday, at 115%@116, closing at the latter price.

TENNESSEE BONDS were quiet in New ork, closing last evening at 821 for the old issue and 811 for the new.

COTTON was strong in New York yesterday with a brisk spinning demand. Mlddlings closed at 201c.

Last week we copied from the Jackson Whig and Tribune an article concerning the organization of secret societies among the negroes of West Tennessee with a view to regulate the division and prices of labor. The Whig and Tribune of Aug. 30 says;

The colored preachers of the Methodist order, and several of their most influential church members in this city, are greatly exercised at our article last week relative to the colored Labor Society recently organized in this county and city. Our articharges, and although the persons referred to may be innocent of all connection with the society, it is none the less a fact that such a society does exist, and for the purposes explained by us. We have ample proof that the society mentioned does exist. and further, that it will do its utmost to accomplish the end mentioned by us last Time will vindicate the truth of

TOBACCO WORMS.

We have never heard so much complaint of tobacco worms. Some farmers have double their force, and with all of that it seems that the worms will ruin the crop. Half the demand for labor in the tobacco fields, cannot be supplied. Where cobalt has been used persistently in Jamestown weed blossoms, poisoning the fly, there is comparatively few worms. Capt. Wm. Harrelson informs us that he planted a Jamestown seed in every tenth row, and it is one hand's business to attend to them every night and morning, and so far he had but few worms and no damage to the crop. This is the case with all whom we have heard speak of using the cobalt. We understand that Mr. Bidwell is managing eight acres to the hand, and that it is a fine crop, clear of worms; three men devote every evening to killing flies with cobalt. -Clarksville Leaf.

CANNEL COAL.

From the Knoxville Press and Herald, Sept. 2 Mr. H. C. Gillespie showed us yesterday a tine specimen of cannel coal dug from a mine near Wheeler's Station, on the Knoxville and Ohio railroad, last Wednesday. Mr. Gillespie informed us that the coal diggers struck several veins of this coal which were pronounced very rich and superior, by those whose geological experience make them competent to judge. Cannel coal or canal coal are merely corruptions of candle coal. In geology, we are informed that it is a kind of a mineral coal, of a black color, sufficiently hard and solid to be cut and polished. It burns readily, with a clear, yellow fisme, and on this account has been used as a sub-titute for candles. The specimen shown us vesterday answers in every particular, to this description, and there can be no doubt as to its genuineness or purity. This may lead to the discovery of a rich mine of this valuable coal, much of which lies hidden in our section, and which can be developed by proper industry and skill.

### WASHINGTON. POLITICAL.

The National Vampires.

New York, Sept. 3:—A Washington dispatch says the Treasury Department has under consideration the question of means whereby the banks now believed to be aiding the gold conspirators can be detected and punished. The Comptroller of Cur-rency has made an examination of two susperted banks in New York without tangible result. It is suggested that a sudden counting of assets by department experts might throw more light upon the actual condition of these banks.
